

The first name in materials testing

# Model 10ST base enclosure mounting Electromechanical Materials Testing Machine

The 10ST base enclosure mounting model is an Electromechanical Materials Testing Machine. It is a robust design for use in a range of materials testing.

## Model 10ST Base enclosure mounting

The model 10ST base enclosure mounting is designed for tension, compression, flexure and shear strength testing on materials and assemblies. Standard base surround is removed from the frame and mounted on table . The robust design that incorporates quality materials and components ensures that our reputation for superior system performance, ease of use, and longevity is maintained. A variety of loadcells are available at differing capacities that give precise applied load measurements from the smallest test specimen to ones that go to full machine capacity. Test machines become complete, powerful test systems with the addition of grips to hold the specimen, strain measurement instrumentation and Tinius Olsen's Horizon Data Analysis software.

### FEATURES AND BENEFITS

- Standard base surround is removed from the frame and mounted on table
- Bluetooth-enabled handheld interface allows maximum flexibility when paired to a testing
- Suitable for tension, compression, flexure, shear and other tests to a maximum force of 10kN/2,000lbf.
- Different system interface options are available, from a familiar tethered handheld interface, a wireless Bluetooth interface panel running an Android application, or virtual machine controller application running on a PC. All interfaces work with Horizon Data Analysis
- Meets or exceeds the requirements of national and international standard for materials testing
- Eight full-length T slots built into the machine column to allow accessories to be securely mounted to the test frame.
- Built-in pneumatic distribution ports provide local air supply to pneumatic grips.

#### INTERFACE OPTIONS

machine by a Bluetooth link. The interface features an Android-based operating platform and can be used to control the machine by itself or in conjunction with Tinius Olsen's Horizon software.

Familiar handheld interface that is tethered to the machine. With its larger, tactile, sealed keypad, this interface is ideal for operators who use gloves to load and unload specimens and prefer a push button keypad. It requires virtual machine control software running on a connected PC to operate the basic machine functions and report basic numerical test data.

#### **Applications**

Most common application for this particular model includes (but not limited to)

In line automated solutions for use by automated process manufacturers who then sell their automated process line to their clients.

## Specifications

Frame spe	cifications	;
Part #		
Tension compression load capability		Yes
7	kN	10
Frame capacity		1000
	kg	
	lbf	2,000
Proof tested	50% over frame capacity	
Floor or table mounting	Floor standing	
Test zones	One	
Number of columns	Two	
Column material	Aluminium extrusion	
Column finish	Anodized	
Column color	Natural	
Base material	Mild Steel	
Base finish	Pre-primed, top powder coat paint	
Base color	TO Cool Grey Web # E6 30 27	
Crosshead material	Mild Steel solid	
Crosshead finish	Pre-primed, top powder coat paint	
Crosshead color	TO Green Web # 00 4C 45	
Base cover	ABS recyclable	
Base cover color		Cal Black Web # 11 18 20
Distance between columns	mm	410
	in	16
Maximum crosshead travel	mm	1090
	in	43
Stiffness	kN/mm	100
	klbf/in	571
Height	mm	1625
-	in	64
Width	mm	729
	in	29
Depth	mm	506
·	in	20
Weight	kg	129
, and the second	lb	284
Force protection system		Yes, digital
Displacement protection system	Yes, mechanical and user programmable	
Accessory fitting interface type	Female diameter	
Ball screw type	High precision low backlash	
Ball screw cover/protection	Yes	
Crosshead drive system	DC servo motor	
Feet material	Non-adjustable impact resistance plastic	
Pneumatic air distribution	4mm OD hose with pushfit coupling, rated to 100psi maximum	
Reference rule to support crosshead positioning	Yes, mm and inches	
T slots in columns for accessory mounting	8 x M6/M8	
Noise at full crosshead speed 2m radius	22db	

NOTE - Software required for materials tests

Frame specifications				
CONTROLLER SPECIFICATIONS				
Max data processing rate		168MHz		
Data acquisition rate at PC	1000Hz			
Number of instrument device connections – external	Four			
Number of instrument device connections – internal	Three			
Bluetooth enabled	v4.0 with A2DP, LE, EDR			
External PC connection	USB			
User interface connectivity	TO HMC2.0, Proterm, Horizon			
FORCE MEASUREMENT				
Force measuring device type		ain gage-based load cell		
	5N, 10N, 25N, 50N, 100N, 250N,			
Load cells available	500N, 1kN, 2.5kN, 5kN, 10kN			
Resolution	One part in 8,388,608			
Accuracy	0.2% of applied force across load cell force range			
	0.2-100%			
Range	10N load cell - 0.5-100%			
	5N load cell - 1-100%			
Calibration standard	+/- 0.5% to ISO 7500-1, ASTM E4			
Internal sampling rate	1000Hz			
EXTENSION M	EASUREME	NT		
Resolution		0.1µm		
Accuracy	+/-50µm			
Range	0.1µm to 1090mm			
Calibration standard		ISO 9513		
Internal sampling rate 2.73kHz				
POSITION	CONTROL	0.0001-1,000 to		
Took Smood	mm/min	10kN		
Test Speed	in/min	0.000004-40 to 2000lbf		
Resolution	μm	0.1		
Resolution	in	0.000004		
Accuracy	+/-0.05% of indicated speed			
Return speed post test	mm/min	0.0001-1,000		
neturn speed post test	in/min	0.000004-40		
Crosshead positioning speed	mm/min	0.0001-1,000		
Cioconica positioning specia	in/min	0.000004-40		
Return to zero function		Yes		
POWER REQ	UIREMENT			
Supply voltage options	115/230V			
Frequency		50/60Hz		
Power 530W +/- 10%  ATMOSPHERIC REQUIREMENTS				
Operating temperature	5-40°C (41-104°F)			
Operating temperature  Operating humidity	10-80% non-condensing wet bulb			
- Faraning namon,	method			
Storage temperature	-10-45°C (14-113°F)			
Storage humidity	10-80% non-condensing wet bulb method
