

The first name in materials testing

50ST Extended height & width

Electromechanical Materials Testing Machine

The 50ST Extended height & width model is a variation of the Tinius Olsen 50ST Electromechanical Materials Testing Machine. It is a robust design for use in a range of materials testing.

Model 50ST Extended height & width

The 50ST extended height & width model designed for tension, compression, flexure and shear strength testing on materials and assemblies. The frame has extended height by 400mm & width by 425mm as compared to standard model. The robust design that incorporates quality materials and components ensures that our reputation for superior system performance, ease of use, and longevity is maintained. A variety of loadcells are available at differing capacities that give precise applied load measurements from the smallest test specimen to ones that go to full machine capacity. Test machines become complete, powerful test systems with the addition of grips to hold the specimen, strain measurement instrumentation and Tinius Olsen's Horizon Data Analysis software.

FEATURES AND BENEFITS

- Extended crosshead travel(1415mm) & width between upright columns(830mm), 25kN
- Bluetooth-enabled handheld interface allows maximum flexibility when paired to a testing machine.
- Suitable for tension, compression, flexure, shear and other tests to a maximum force of 25kN/5,000lbf.
- Different system interface options are available, from a familiar tethered handheld interface, a wireless Bluetooth interface panel running an Android application, or virtual machine controller application running on a PC. All interfaces work with Horizon Data Analysis software.
- Meets or exceeds the requirements of national and international standard for materials testing systems.
- Eight full-length T slots built into the machine column to allow accessories to be securely mounted to the test frame.
- Built-in pneumatic distribution ports provide local air supply to pneumatic grips.

INTERFACE OPTIONS

Proterm

Familiar handheld interface that is tethered to the machine. With its larger, tactile, sealed keypad, this interface is ideal for operators who use gloves to load and unload specimens and prefer a push button keypad. It requires virtual machine control software running on a connected PC to operate the basic machine functions and report basic numerical test data.

APPLICATIONS

Most common application for this particular model includes (but not limited to)

- Component testing
- Babies car seat
- Suite case
- Large boxes
- Plastic pipes
- Any else bigger and higher component or finished product.

Specifications

Frame specifications				
Item #		99-991-1050/60		
Tension compression load capability		Yes		
	kN	25		
Frame capacity	kg	2,500		
	lbf	5,000		
Proof tested	50	0% over frame capacity		
Floor or table mounting		Table mounting		
Test zones	One			
Number of columns	Two			
Column material		Aluminium extrusion		
Column finish	Anodized			
Column color	Natural			
Base material	Mild Steel			
Base finish	Pre-prime	ed, top powder coat paint		
Base color	TO Cool Grey Web # E6 30 27			
Crosshead material	Mild Steel solid			
Crosshead finish	Pre-primed, top powder coat paint			
Crosshead color	TO Green Web # 00 4C 45			
Base cover	ABS recyclable			
Base cover color	Cal Black Web # 11 18 20			
Distance between columns	mm	830		
	in	33		
Maximum crosshead travel	mm	1415		
	in	56		
Stiffness	kN/mm	100		
	klbf/in	571		
Height	mm	2065		
-	in	81		
Width	mm	1154		
	in	45		
Depth	mm	551 22		
	in	317		
Weight	kg	699		
Force protection system	15	Yes, digital		
Displacement protection system	Yes, mechanical and user			
Accessory fitting interface type	programmable Female diameter			
Ball screw type	High precision low backlash			
	Yes			
Ball screw cover/protection		DC servo motor		
Crosshead drive system		DC servo motor		
		Non-adjustable impact		
Crosshead drive system				

Frame specifications		
T slots in columns for accessory mounting	8 x M6/M8	
Noise at full crosshead speed 2m radius	22db	

mounting	o x monito			
Noise at full crosshead speed 2m radius	22db			
NOTE – Software required for mater	ials tests			
CONTROLLER S	PECIFICATI	ONS		
Max data processing rate		168MHz		
Data acquisition rate at PC	1000Hz			
Number of instrument device connections – external	Four			
Number of instrument device connections – internal	Three			
Bluetooth enabled	\	4.0 with A2DP, LE, EDR		
External PC connection		USB		
User interface connectivity	то нл	MC2.0, Proterm, Horizon		
FORCE MEA				
Force measuring device type	St	rain gage-based load cell		
Load cells available	25N, 5	25N, 50N, 100N, 250N, 500N, 1kN, 2.5kN, 5kN, 10kN		
Resolution		One part in 8,388,608		
Accuracy	0.2% of	0.2% of applied force across load cell force range		
Range	0.2-100%			
Calibration standard	+/- 0.5% to ISO 7500-1 ASTM E4			
Internal sampling rate	1000Hz			
EXTENSION MEASUREMENT				
Resolution		0.1µm		
Accuracy	+/-50µm			
Range	0.1µm to 1415mm			
Calibration standard	ISO 9513			
Internal sampling rate	2.73kHz			
POSITION CONTROL				
T . C . I	mm/min	0.0001-500 @ 25kN		
Test Speed	in/min	0.000004-20 @5klbf		
Deceleties.	μm	0.1
