

The first name in materials testing

50ST Through-base Capability Electromechanical Materials Testing Machine

The 50ST through-base capable model is a variation of the Tinius Olsen 50ST Electromechanical Materials Testing Machine. It is a robust design for use in a range of materials testing.

Model 50ST Through-base capability

The 50ST through-base capable model designed for tension, compression, flexure and shear strength testing on materials and assemblies. The frame allows for a larger and if required enclosed additional test zone below the testing frame and lab table. The robust design that incorporates quality materials and components ensures that our reputation for superior system performance, ease of use, and longevity is maintained. A variety of loadcells are available at differing capacities that give precise applied load measurements from the smallest test specimen to ones that go to full machine capacity. Test machines become complete, powerful test systems with the addition of grips to hold the specimen, strain measurement instrumentation and Tinius Olsen's Horizon Data Analysis software.

FEATURES AND BENEFITS

- Through frame base tie rod for additional testing zone below.
- Bluetooth-enabled handheld interface allows maximum flexibility when paired to a testing machine.
- Suitable for tension, compression, flexure, shear and other tests to a maximum force of 50kN/11,000lbf.
- Different system interface options are available, from a familiar tethered handheld interface, a wireless Bluetooth interface panel running an Android application, or virtual machine controller application running on a PC. All interfaces work with Horizon Data Analysis software.
- Meets or exceeds the requirements of national and international standard for materials testing systems.
- Eight full-length T slots built into the machine column to allow accessories to be securely mounted to the test frame.
- Built-in pneumatic distribution ports provide local air supply to pneumatic grips.

INTERFACE OPTIONS

Familiar handheld interface that is tethered to the machine. With its larger, tactile, sealed keypad, this interface is ideal for operators who use gloves to load and unload specimens and prefer a push button keypad. It requires virtual machine control software running on a connected PC to operate the basic machine functions and report basic numerical test data.

APPLICATIONS

Most common application for this particular model includes (but not limited to)

Testing glass containers enclosures

Specifications

Frame specifications				
Item #		99-991-1050/1G		
Tension compression load capability		Yes		
	kN	50		
Frame capacity	kg	5,000		
	lbf	11,000		
Proof tested	5	0% over frame capacity		
Floor or table mounting	Table mounting			
Test zones		One		
Number of columns		Two		
Column material		Aluminium extrusion		
Column finish		Anodized		
Column color		Natural		
Base material		Mild Steel		
Base finish	Pre-prime	ed, top powder coat paint		
Base color	TO Cod	ol Grey Web # E6 30 27		
Crosshead material		Mild Steel solid		
Crosshead finish	Pre-primed, top powder coat paint			
Crosshead color	TO Green Web # 00 4C 45			
Base cover		ABS recyclable		
Base cover color	Cal Black Web # 11 18 20			
Distance between columns	mm	405		
Distance between columns	in	16		
Maximum crosshead travel	mm	1065		
Muximum crossicad craver	in	42		
Stiffness	kN/mm	100		
Julilless	klbf/in	571		
Uniaht	mm	1655		
Height	in	65		
Width	mm	729		
Width	in	29		
Depth	mm	506		
	in	20		
Weight	kg	192		
·	lb	423		
Force protection system		Yes, digital		
Displacement protection system	Ye	Yes, mechanical and user programmable		
Accessory fitting interface type		Female diameter		
Ball screw type	High	High precision low backlash		
Ball screw cover/protection		Yes		
Crosshead drive system		DC servo motor		
Feet material		Non-adjustable impact resistance plastic		
Pneumatic air distribution		4mm OD hose with pushfit coupling, rated to 100psi maximum		
Reference rule to support crosshead positioning		Yes, mm and inches		
T slots in columns for accessory mounting		8 x M6/M8		

Frame sp	pecifications
Noise at full crosshead speed 2m radius	22db
NOTE CC: : IC
